PRICE LIST 2008

TOP 200 SURGICAL INSTRUMENT PRICE LIST

This is a selection of our top 200 Instrument lines. We aim to keep all stock on the shelves to allow us to offer a rapid service.

With over 40 years of manufacturing expertise and dedication to quality, we produce some of the finest instruments in the world.

All our instruments are handmade by skilled craftsmen to the highest tolerances and specifications. Each product is designed to exceed the needs of the clinician and provide years of trouble free service, backed by our unrivalled Lifetime Guarantee.

LIFETIME GUARANTEE

At Timesco, we maintain a simple philosophy, 'look after your customers.' This is why all Timesco reusable surgical instruments are covered by our unrivalled lifetime guarantee.

Should any of our reusable instruments crack, bend, deform, corrode or fail whilst being used for the intended purpose, we will simply replace it with a new one or repair it free of charge. This guarantee applies throughout the working life of our instrument.

We do not require any purchase order numbers, copy invoices or other proofs of purchase, the Timesco brand on the product acts as your guarantee. All we ask is that the instrument is cared for and not abused. Our guarantee does not cover fair wear and tear. Please refer to the care and maintenance in our reprocessing instructions supplied with each instrument.

Should any of our products require attention at any time, we have a dedicated after sales team committed to resolving your problems, quickly and efficiently. Simply call us on 01268 297 710 or email us at aftersales@timesco.com for our immediate attention. Customers based outside the UK should contact their local Timesco distributor.

THE COMPETITIVE EDGE

We never forget that our customers have a choice. Whilst we have over 70% market share in some of the areas we operate, we know that quality is nothing if it is not affordable.

Although we place quality and service at the forefront of our offering, we need to ensure we are realistically priced. The large volumes we produce for the UK and international markets allow us economies of scale that we can pass on to our customers.

We also continuously re-evaluate our processes and procedures to ensure we are operating as leanly as possible without affecting the quality and service we provide.

We believe our prices are some of the most competitive in our industry and we work hard to maintain this competitive edge.

Our products are now used by over 90% of Hospitals throughout the UK. We are proud to be recognised as a major partner for the NHS and private sectors.

Throughout Surgery, Anaesthesia, Podiatry, Emergency and Diagnostics, we aim to be the preferred partner for quality products, the highest level of customer care and competitive pricing.

STEEL AND QUALITY STANDARDS

We operate a strict quality control system throughout our manufacturing and finishing processes. Once a product has passed our final quality control department, it is cleaned, packed in high grade polythene and individually labelled with full tracking numbers, our bar code and date of manufacture.

Instruments are supplied with care and maintenance and reprocessing instructions.

All our reusable theatre instruments conform to the medical device directive 93/42/EEC.

Our instruments are manufactured to conform to the following standards (where applicable):

BS 5194-2
BS 5194-3
BS 5194-4
BSEN ISO 13402

Our instruments are manufactured from steel conforming to:

BSEN ISO 7153-1
BS 5194-1

We are certified to ISO 13485 and all of our instruments are CE marked.
